

Socket Outlets

SCHUKO and French/Belgian Standard

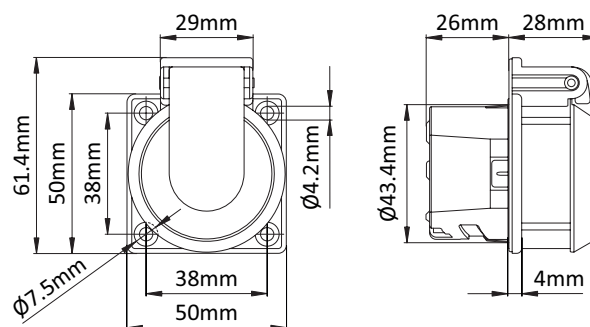

Techna's range of SCHUKO and French/Belgian Standard premium quality flush mount Socket Outlets are made from high impact resistant thermoplastic and are equipped with a quadruple flanged fixing. They are available in blue and grey with a self-closing hinged lid or black, blue and grey without a lid.

The SCHUKOplus Series of flush mount Socket Outlets are made of high-performance Elamid 2K plastic, making them highly resistant and robust, ideal for extremely heavy duty use and perfectly suited to portable applications. These SCHUKOplus socket outlets feature a flanged fixing and an integrated rim to ensure that they are always sealed, whether plugged or unplugged. They have a self-closing hinged lid and are available in blue or black with either a red, yellow or grey lid.

Our SCHUKO and French/Belgian socket outlets are UV resistant and have very good resistance to most oils, greases, solvents and cleaning agents, hydrocarbons as well as organic and inorganic bases in normal concentrations.
