

Feed Through Push-In Terminal Blocks

The CP Series Feed Through Push-In Terminal Blocks have a specialised connection system that enables tool-less wire connections.

Ferruled cable and solid wires can be directly pressed into the clamp to make connections.

The push button on the top can be pressed for using stranded cable without ferrule for connection.

Cross connection of the terminal blocks can be done using pluggable jumpers, which are available in various pole configurations.

Ground / Earth Push-In Terminal Blocks

TtecCPG series are compact Push-In type earthing Terminal Blocks with specially designed alloy feet which achieve very low contact resistance and vibration proof grounding with the DIN rail. They are green/yellow colour coded as per industry standards.

Cross connection of these terminal blocks can be done using insulated pluggable jumpers.

Multi connection 3 wire & 4 wire terminals eliminate reliability problems encountered when there is a need to connect multiple wires in a single Terminal Block.

Double Level Push-In Terminal Blocks

TtecCPDL1.5 & TtecCPDL2.5 are compact double level type terminal blocks which are used in high density wiring applications. Interconnection / jumpering is possible on both levels.

TtecCPDL1.5(I.S) & TtecCPDL2.5(I.S) are double level internally shorted terminal blocks. These are an ideal choice for distribution applications.

TtecCPDLG1.5 & TtecCPDLG2.5 are double level Terminal Blocks with an additional grounding point for terminating grounding cables on the lower level of the terminal block. The earth connection is made by snapping the terminal on the Din rail. This connection point is identified by the green/yellow imprint.

The TtecCPDLG1.5(I.S) & TtecCPDLG2.5(I.S) are double level ground Terminal Blocks with 4 connection points for grounding wires and in a green/yellow colour to indicate the grounding connection.

Triple Level Push-In Terminal Blocks

TtecCP3L2.5 is a three level feed through Terminal Block. This is a practical solution for creating high density wiring circuits.

TtecCP3L2.5(I.S) is a three level internally shorted version and is an ideal choice for distribution circuits.

TtecCP3LG2.5 has 2 feed through levels and a 3rd grounding level.

In TtecCP3LG2.5(I.S) all three levels are internally shorted to the ground contact.

TtecCP4LG2.5 has 3 feed through levels and a 4th grounding level. This is suitable for three phase wire connection applications.

Disconnecting Push-In Terminal Blocks

TtecCPDLK series terminals are double level disconnect Terminal Blocks.

In these push-in Terminal Blocks disconnection is achieved by opening the insulated knife (blade) contact. The disconnecting knife is appropriately colour coded to ensure error free disconnection of the correct circuit.

TtecCPDLK2.5 Terminal Blocks offer disconnection separately for both top and bottom levels.

TtecCPDLK2.5(I.S) Terminal Block is internally shorted, offering single potential for all 4 connection points.

TtecCPDLKFT2.5 is double level Terminal Block with a disconnecting lever on the top level and a feed through system on the bottom level.

TtecCPDLKFT2.5(I.S) offer similar configuration with top and bottom level internally shorted.

Alternate and continuous bridging can be done with standard pluggable jumpers.

Sensor & Actuator Push-In Terminal Blocks

Sensor and Actuator Terminal Blocks are ideal for wiring modern machine control systems and are extremely compact with a thickness of 3.5mm.

The TtecCPST1.5/3 is a 3 wire sensor Terminal Block that can be bridged together with a power feed through terminal TtecCPPT2.5/3 by using standard pluggable jumpers.

TtecCPST1.5/4 is a 4 wire sensor Terminal Block which can be used in conjunction with a TtecCPPTG2.5/4 power feed through terminal.

The TtecCPSTG1.5/4 has an additional grounding point available and is colour coded green/yellow for clear identification.

TtecCPPT2.5/3 is used to bring in the power connection for 3 wire sensor terminals TtecCPST1.5/3.

TtecCPPTG2.5/4 is used for 4 wire sensor terminals TtecCPST1.5/4 & TtecCPSTG1.5/4.

Blue & Red colour jumpers are available for clear circuit identification.

Model		Ttec CPST1.5/3		Ttec CPST1.5/4	
Width (Thickness) x Length		3.5 x 79.8 mm		3.5 x 96.5 mm	
Height with DIN-Rail: 35 x 7.5 / 35 x 15 mm Rail		48.1 mm / 55.55 mm		48.1 mm / 55.55 mm

8 Level Marshalling Push-In Terminal Blocks

The TtecCP8L32 is an 8 Level Marshalling Terminal Block which offers 32 connection points in a space saving configuration for potential and signal distribution. It has Push-In technology for easy wiring connection. Standard test probes can be inserted to carry out various test protocols.

The Ttec CP8L32(I.S) is an internally shorted terminal block offering multiple connection points for distribution applications.

In the TtecCP8L32(I.S)H the top four levels are interconnected and the bottom four levels are shorted. They are independent of each other and are used for signal distribution applications.

Colour coding provides easy identification of the termination point to ensure error free operation.
